

Research

- On implementing research papers, by papers-100-lines:
 - Easy ones are seminal papers demonstrated on toy problems with minimal compute.
 - Medium ones add training complexities or multiple components.
 - Hard ones are full systems with heavy engineering, large datasets, and heavy compute.
- On resume writing, three stages:
 - That you can build stuff.
 - That you understand how stuff works.
 - That you can improve systems or even better, generate revenue.

Books

- Intro Prob and Statistics, Paul L. Meyer.
- Reinforcement Learning and Stochastic Optimization; A unified framework, Warren B powell.
- Markov Decision Processes: Discrete Stochastic Dynamic Programming, Martin L. Puterman
