

# Research

- On implementing research papers, by papers-100-lines:
  - Easy ones are seminal papers demonstrated on toy problems with minimal compute.
  - Medium ones add training complexities or multiple components.
  - Hard ones are full systems with heavy engineering, large datasets, and heavy compute.
- On resume writing, three stages:
  - That you can build stuff.
  - That you understand how stuff works.
  - That you can improve systems or even better, generate revenue.
