

Research

- On implementing research papers, by papers-100-lines:
 1. Easy ones are seminal papers demonstrated on toy problems with minimal compute.
 2. Medium ones add training complexities or multiple components.
 3. Hard ones are full systems with heavy engineering, large datasets, and heavy compute.
- On resume writing, three stages:
 1. That you can build stuff.
 2. That you understand how stuff works.
 3. That you can improve systems or even better, generate revenue.

- Sumatra pdf settings:

```
# For documentation, see https://www.sumatrapdfreader.org/settings/settings3-4-6.html
